# St. John's Diabetes Academy

## Academy Description

---

St. John's Diabetes Academy was designed as a forum to bring the latest treatment and management skills guidelines of Diabetes Mellitus to practicing health professionals in the Ventura County Area. The goal of this program is to improve the clinical outcomes of the person diagnosed with diabetes mellitus in both the outpatient and hospital environment.

**Session II** will cover ten professional symposia starting on February 22nd 2005. This will conclude the first St. John's Diabetes Academy. This session's topics will include, but will not be limited to insulin therapies, usage of oral medication and other management therapies. The expert speakers will use the didactic method, including case studies, question and answer periods. Pre-tests and post-tests will be given to the Academy participants.

**For any missed sessions**  
video tapes and DVDs will be available,  
at the St. John's Medical Library  
988-2820.

The Diabetes Academy is intended for those in the primary care specialties of Internal Medicine, Family Medicine and Pediatrics. All interested health care professionals who would benefit from a comprehensive update in the field of diabetes are welcome to attend.

## Academy Overall Educational Objectives

---

- **Develop** site-specific practical interventions that improve diabetes outcomes based on the Diabetes Mellitus Chronic Care Model
- **Improve** knowledge base among healthcare professionals attending the diabetes mellitus St. John's Diabetes Academy
- **Acquire** clinical management skills in the area of diabetes mellitus
- **Work** closely as an interdisciplinary team to manage diabetes mellitus in the Ventura County.
- **Identify** features of chronic illness care that differentiate it from acute illness care.
